

# MARINER® DEFORMITY

SPINAL DEFORMITY SYSTEM  
SALES BROCHURE

**The SeaSpine® Mariner® Deformity Posterior Fixation System** is a comprehensive pedicle screw system built upon the Mariner modular platform. The system features differentiated modular threaded technology with thoughtfully designed instrumentation and packaged within a streamlined offering. The Mariner Deformity System is designed with a focus on providing refined clinical solutions in challenging adult deformity surgery.

## SYSTEM FEATURES

- Modular implant platform maximizes the number of options while minimizing the overall footprint specific to inventory requirements within an adult deformity procedure.
- Powerful, effective, and reproducible instrumentation to support various deformity correction techniques.
- Market-leading implant versatility designed to facilitate solution-based clinical efficiencies.
- Implant offerings that accept both 5.5 and 6.0mm rods. These rods are available in Titanium, Cobalt Chrome, ESS, and ESS+ materials.

SPINAL DEFORMITY SYSTEM

## SYSTEM FEATURES

### Iliac Fixation Solutions

- Closed Lateral Connector with Gimbal
- Open Lateral Connector
- Closed Polyaxial Head

### Multi-Rod Implants

- Polyaxial Head with Attached Gimbal
- Polyaxial Head with Attached Saddle

### Motion Limiting Implants

- Uni-Planar Screws
- Uni-Axial Screws

### Extensive Implant Offering

- Modular Head Offering
- High and Low PI Rods

### Reducer Options

- Pistol Grip Reducer
- Rod Rocker
- Axial Reducer

### Multi-Function Instrumentation

- Axial Reducer Extension
- Segmental Derotation Assembly
- Counter Torque Adapter
