

# OSTEOSTRAND<sup>®</sup>

100% DEMINERALIZED BONE FIBERS  
SALES BROCHURE

# OSTEOSTRAND<sup>®</sup>

## FEATURES

The OsteoStrand<sup>®</sup> fibers were developed through a disciplined R&D process that evaluated a variety of fiber geometries to deliver osteoinductivity, osteoconductivity, intraoperative handling and controlled expansion. OsteoStrand is 100% demineralized bone fibers designed to unleash the bone forming capacity and fusion potential.

### 100% Demineralized Bone Fibers

- No added fillers for maximum bone content
- Specific fiber geometry selected from a wide range of configurations based upon preferred handling, placement, expansion, and bone forming capacity<sup>1</sup>
- Delivers osteoconductive scaffold with osteoinductive potential

### Cellular Highways

- Fibers have demonstrated superior bone forming capacity vs. standard particulate DBM<sup>1,2</sup>
- Entangled fibers provide a three-dimensional interconnected network to promote cell migration and fusion
- OsteoStrand fibers purposefully selected to maximize the osteoconductive performance<sup>1</sup>

### Moldable and Cohesive

- Controlled demineralized bone fiber geometry provides exceptional handling properties

### Expands to Fill Gaps

- Wicks blood, bone marrow and other physiological fluids which allows graft to expand to improve fill

### Procedural Integration with RAPID<sup>®</sup>

- Predictable and controlled delivery for optimal graft placement
- Increased OR efficiencies

## OsteoStrand Ordering Information

Part #	Product Volume
56700010	X-small (1.25cc)
56700025	Small (2.5cc)
56700050	Medium (5cc)
56700100	Large (10cc)

Refer to Instructions for Use for indications and important safety information
