

Air/Gel Ankle Stirrup

DCT-4350 The Air/Gel Stirrup Ankle Brace offers enhanced ankle stability by minimizing rotational movement. It features dual-purpose air/gel padding, which can be used as standard support or cooled in the freezer for cold therapy applications. This versatile brace fits either the left or right foot and is ideal for both acute injury management and long-term recovery.

Superior Recovery Stabilization

Facilitates recovery stabilization and aids in reducing swelling and discomfort during rehabilitation. This brace supports the healing process by providing consistent compression and targeted cold therapy.

Suggested HCPC Code: L4350

Highlights

- Gel/Air padding
- Easy to use strapping system
- Enhanced stability
- Universal fit
- Injury management

Indications

- Acute ankle sprains
- Ankle instability

Enhanced Stability

Enhanced stability minimizes rotational movement, preventing further injury and promoting faster healing. The rigid shell design offers superior support to the ankle joint, maintaining proper alignment and reducing the risk of re-injury during activity.
