

QuickForm Ankle

DCT-1902 The QuickForm Ankle brace features a quick-lace strapping system that enables a rapid application and precise compression adjustment. This system provides optimal support while remaining easy to use. Constructed with breathable materials, the brace enhances patient comfort and compliance, making it suitable for extended wear. The adjustable design accommodates a range of ankle sizes and shapes, ensuring a secure, personalized fit for effective support.

Lacing Mechanism

The lacing mechanism allows for rapid and efficient application of the brace, ensuring precise compression and support. This feature enhances user convenience and improves overall effectiveness by allowing quick adjustments for an optimal fit.

Highlights

- Supportive efficiency
- Ventilated construction
- Customizable fit

Indications

- Chronic ankle instability
- Ankle sprains and strains

Ventilated Construction

The ventilated construction of the brace ensures breathability, enhancing patient comfort and compliance. This design feature helps prevent overheating and promotes prolonged wear without discomfort.

Suggested HCPC Code: L1902
